(54) Title: COLOUR-SEQUENTIAL PROJECTION SYSTEM COMPRISING FOUR PRIMARY COLOURS

(57) Abstract: A projection display device comprises an illumination system having a light source providing an illumination beam, a colour filter means comprising four different colour filter segments, corresponding to four different primary colours, respectively, for scanning an image display panel with different coloured portions of the illumination beam, and an image display system comprising said image display panel for modulating the coloured portions of the illumination beam with image information and projecting an image on a screen. The device is characterized in that the colour filter segments are arranged to allow simultaneous scanning of said image display panel with at least three of said four primary colours.
